SKIN2P Body® & SCREEN2P Wear® Kit

Insect Double Protection Kit for Skin and Clothing

DESCRIPTION

Vector-borne diseases such as Yellow Fever, Zika, Malaria, Chikungunya and Leishmaniosis are killing over 1 million people every year, with just 1 bit.

With mosquito bites occurring at day as at dawn, sunset and night, SKIN2P Body® is the ideal long lasting protection needed by the travellers to stay safe during all they journey and stay. SKIN2P Body® exclusive non-flammable, aqueous, Icaridine based repellent for skin, provides proven protection for 8 hours against mosquitos, and also ticks and sandflies.

With 40% of the bites occurring through closing, SCREEN2P Wear® is the ideal long lasting protection needed on clothes by the travellers to stay safe during all they journey and stay.

SCREEN2P Wear® exclusive non-flammable, water based insecticide for clothes, provides proven efficacy lasting up to five washes

Brought to you as a convenient kit, and used jointly, SKIN2P Body® and SCREEN2P Wear® double protection give you the best complete solution against vector borne disease for the traveller.

Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation

APPLICATION – USE / See next page

TECHNICAL DATA SHEET

APPLICATION - USE

SKIN2P Body® spray

1. Spray directly onto the parts of the body to be protected. For the face, spray the product on the hand before applying it.
2. Spread the repellent evenly on healthy, clean, dry skin.
3. Repeat the application 2 to 3 times a day if sweating, and routinely after each swim.
4. In humid climates, renew the application more frequently.
5. Apply the repellent at least 20 minutes after sunscreen.

*Dose applied according to the WHO: 1g of product per 600 cm²
(600 cm² is the estimated surface area of a forearm).*

Test the product beforehand on a small portion of skin. Wash hands before eating.

Do not apply on mucous membranes.

The spray delivers a dose of 100 µl.

When application involves the face and 2 forearms, one 30g spray unit provides 10 applications

Use biocides with caution. Before use, read the label and information concerning the product.

SCREEN2P Wear® spray

Spray at a distance of 15 cm

1. The 30ml bottle enables the treatment of 1,7 m² of fabric (equivalent to 1 outfits).
2. To spray vertically place the garment on a hanger.
 - a. Shake well and then spray 15 cm from the garment; A single spray in the same place, at a distance of 15 cm, is enough to achieve the dose required for efficacy.
To guarantee even distribution of the product on the garment at the recommended dose, carry out juxtaposed sprays, i.e. the spraying rounds must be physically close and they almost touch each other.
Repeat the treatment on the back.
 - b. For garments that are laid flat, tilt the bottle slightly and spray at a distance of 15 cm from the garment. Impregnation is checked visually by the change in colour due to the fabric becoming damp.
3. The drying time is one hour.
4. Renew the application every 5 washes and after dry cleaning.

	Shirt body	Sleeve held out	One leg up to the belt	Sock
Treatment on the front	39 sprays	28 sprays	50 sprays	3 sprays
Treatment on the back	Repeat the treatment on the back of the garment			
Total	190 sprays		200 sprays	6 sprays
